

SRA Selects Somat Engineering, Inc. for the U.S. Environmental Protection Agency's Information Technology Solutions - Business Information Strategic Support II Contract (ITS-BISS II)

Washington, DC – February 7, 2011 – Somat Engineering, Inc. (Somat), an award winning technical services firm, serving both the public and private sector, announced today that it is a subcontractor for the U.S. Environmental Protection Agency's (EPA) Information Technology Solutions - Business Information Strategic Support II (ITS-BISS II) contract just awarded to prime contractor SRA International, Inc. (SRA). The multiple-award blanket purchase agreement has a term of five years with a maximum value to the SRA team of \$99.7 million.

ITS-BISS II was developed and awarded by the U.S. Environmental Protection Agency (EPA), Office of Environmental Information (OEI) to support the agency's information technology (IT) and information management (IM) missions with a full range of advisory and assistance services, including policy, planning and program management support, services and solutions. Responsibilities for the SRA team under the contract include maintaining or enhancing IT/IM planning, investment management, security and federal enterprise architecture, by providing both technical and management expertise to the EPA's various national and regional programs and offices.

"We are very excited about the opportunity to work with the SRA team and provide superior IT support and services to the EPA and OEI," said G. "Ram" Ramanujam, President and CEO of Somat. "Given our history of excellence in environmental engineering, we are looking forward to complementing that experience by supporting the EPA's information technology goals and mission."

About Somat Engineering, Inc.

Founded in 1986, Somat Engineering, Inc. (<http://tech.somateng.com/>) is an award-winning technical services firm, based in Detroit, MI, with satellite offices in the US and abroad, including Washington, DC.

Somat combines research, engineering and innovative thinking to deliver customized information technology products and services to both government and commercial organizations. We leverage over 20 years of analytical and operational discipline developed by tackling complex engineering problems on critical infrastructure projects to assist our clients in selected areas of information technology, including knowledge management, intelligent transportation systems and wireless technologies.

Somat serves a variety of sectors, including defense, law enforcement, transportation, utilities, financial services, healthcare and social services at the federal, state and municipal level.

We are eligible as a US SBA 8(a) Business to participate in various programs for contracting opportunities throughout the Federal Government.
